## How To Purchase MAGNA Software

MAGNA allows for it's clients to have control of the level of IT servicing they need. It's clients can have all the control by purchasing the software with their own server on site, or they can take advantage of it's ASP services. (ASP is application service provider.) Both services are web-based for easy access anywhere. So no matter the size of the resort or amount of resources that are available MAGNA is a good fit. MAGNA is used in timeshare resorts including single-site, multi-site, points-based clubs, vacation ownership associations and fractional ownership properties.

### 1. MAGNA: Self Hosted On-site Enterprise Software:

You are in control with MAGNA! You purchase the software and our timeshare IT gurus will install it at your place of business. The software is setup is directly on a server at your location that you maintain, unless otherwise agreed upon. MAGNA is accessible from any computer with an internet connection, which gives you and your staff freedom to work from nearly anywhere. Specific pricing per module would be determined by your actual needs. Support packages can be purchased as a monthly plan.

2. MAGNA.net: Enterprise Software as a Service:           No need to worry, we have you covered! When you subscribe to MAGNA.net, we house your information on one of our secure servers and all you need is a computer with internet access to use the software. This is priced per concurrent user based on your needs. Support packages and software updates are included in the monthly concurrent user fee. The rate per concurrent user goes down as you add more users.
